STELLAR CONNECTIONS: FROM GALAXY EVOLUTION TO EXOPLANETS

February 1–3, 2021 - São Paulo, Brazil
Virtual meeting

Invited speakers

Galactic archaeology: Kátia Cunha (*University of Arizona, USA & Observatório Nacional, Brazil*) · Ella Xi Wang (*Australian National University, Australia*)

Stellar astrophysics: Saskia Hekker (*Heidelberg Institute for Theoretical Studies; Zentrum für Astronomie, University of Heidelberg, Germany*)

The Sun as a star: Antonino Lanza (*Osservatorio Astrofisico di Catania, INAF, Italy*)

Exoplanets: Mark Swain (*Jet Propulsion Laboratory, NASA, USA*)

Star-planet connection: Sarah Rugheimer (*Atmospheric, Oceanic, and Planetary Physics Department, Clarendon Laboratory, University of Oxford, UK*)

Scientific Organizing Committee (SOC): Jorge Meléndez (*chair, IAG-USP*) · Adriana Valio (*CRAAM-Mackenzie*) · Diego Lorenzo-Oliveira (*IAG-USP*) · Jhon Yana Galarza (*IAG-USP*) · Raíssa Estrela (*JPL-NASA*)

Local Organizing Committee (LOC): Geisa Ponte (*chair, IAG-USP*) · Fabian Menezes (*CRAAM-Mackenzie*) · Yuri Netto (*IAG-USP*) · Giulia Martos (*IAG-USP*) · Gabriela Carvalho Silva (*IF-USP*) · Bruna Barroso Gomes (*IF-USP*)

Applications until January 9, 2021
